One-Button Recline

Head Up

Head Down

Under Bed Light

Anti-Snore Mode

Memory Mode

Zero Gravity Mode

Foot Up

Foot Down

## Features

### Anti-Snore

Press once to raise the head of the bed by 12 degrees. This elevation helps prevent airway compression, ensuring smooth breathing and effectively controlling snoring.

### Zero Gravity

Based on NASA's space capsule seat design principles, this mode sets the heart and knees at the same height, achieving a balanced body weight distribution. This optimizes blood circulation with a body angle of 122 degrees ( $\pm 7$  degrees).

**COUGAR**

## Features

### TV Mode

Press once to automatically raise the head of the bed to 60 degrees, providing a comfortable position similar to sitting on a sofa. This enhances comfort while watching TV/movies or reading.

### Memory Mode

Allows users to save their preferred angles and recall them with one button, similar to advanced electric car seats.

### Flat Position

Instantly returns the bed to a flat position, making it easy to return to a sleeping position, make the bed, or readjust to a preferred angle.

## Features

### Under Back LED Light

Provides appropriate lighting at night, illuminating the area under the bed to ensure safe steps and avoid accidents.

### USB QC3.0 Charger

Equipped with USB Type A and Type C fast charging ports (Max 30W+30W) on the side of the bed, allowing users to charge their electronic devices without leaving the bed.

USB charger is located under the center of the bed.

# Features

## Child Lock

Automatically activates a safety lock function after 60 seconds of inactivity with the remote control, preventing children from accidentally pressing the down button and getting injured.

## Remote Back Light

Features a ball switch design; when the remote is lifted to a certain angle, white backlighting is triggered, allowing clear visibility of each button in a dark environment.
